IN THE UNITED STATES PATENT AND TRADEMARK OFFICE
BEFORE THE TRADEMARK TRIAL AND APPEAL BOARD

Application Serial No.	79122826
Applicant	Hydac Fluidtechnik GmbH

Notice of Appeal

Notice is hereby given that Hydac Fluidtechnik GmbH appeals to the Trademark Trial and Appeal Board the refusal to register the mark depicted in Application Serial No. 79122826.

Applicant has filed a request for reconsideration of the refusal to register, and requests suspension of the appeal pending consideration of the request by the Examining Attorney.

The refusal to register has been appealed as to the following classes of goods/services:

- Class 006. First Use: 0 First Use In Commerce: 0
All goods and services in the class are appealed, namely: Ironmongery and small items of metal hardware, namely screws; fittings of metal for fastening storage units, filters, valves and control blocks, and gas, liquid and electronic conduits, namely, metal screws; mechanical fastening elements of metal; metal clips for connecting hydraulic and pneumatic system parts; hose couplings and connections, namely, metal hose connection fittings; metal storage tanks, namely hydraulic tanks; housings and parts therefor in particular in the form of storage housings and filter housings for pneumatic and hydraulic apparatus, namely, metal storage tanks and housings
- Class 007. First Use: 0 First Use In Commerce: 0
All goods and services in the class are appealed, namely: Fluid-engineering, gas-engineering and lubrication-engineering installations and components of all kinds, in this class, in particular for use in the automobile industry, including mobile hydraulics, the semiconductor industry, the food industry, aeronautics, medicine, pharmacy, oil and gas transport technology, environmental engineering, laboratory and testing technology, household and sanitary systems, machine tools, transfer presses and plastic injection moulding machines, namely, hydraulic and pneumatic valve actuators and power pumps for power applications, lubricating pumps for lubrication applications, and cooling pumps for cooling machines; hydropneumatic storage units being parts of pneumatically and hydraulically operated machines; hydraulic accumulators, as parts of a wide variety of machines used in power applications, lubricators and coolers, namely, piston accumulators, bladder accumulators, diaphragm accumulators, bellows accumulators, spring accumulators; accumulator installations consisting of hydraulic accumulators, being parts of machines including for offshore and deep sea machines; hydraulic, hydropneumatic and reflective sound, vibration and pressure dampers, namely, shock absorbers for machines and silencers for machines; shut-off equipment, shut-off apparatus, shut-off valves and switch-over devices, namely valves being parts of machines for pneumatic and hydraulic fuels and media, namely, flow control valves, priority valves, shuttle valves, seat valves and slide valves, throttle valves, directional control valves, check valves, pressure valves, pressure control valves and pressure limiting valves, and vent valves; hydraulic and pneumatic control apparatus being parts of machines, in particular for hydraulic and pneumatic installations, namely, hydraulic and pneumatic valve control blocks for controlling hydraulic and pneumatic machines; power and mechanically operated clamping apparatus, clamping machines and clamping tools, namely, clamps with movable jaws for retaining parts and workpieces on industrial machines; motor-driven hydraulic pressure and feed pumps, adjustable and non-adjustable, as parts of machines; hydraulic drive units for elevator controllers, transport controllers and lift controllers, in particular including a hydraulic pump, a drive motor and a liquid container of metal or plastic; machines for industrial washing and cleaning, namely, pressure washers for cleaning industrial equipment; electric motors for industrial machines
- Class 011. First Use: 0 First Use In Commerce: 0
All goods and services in the class are appealed, namely: Gas-technical installations and components, all the aforesaid goods included in this class, in particular for use in the automobile industry, including mobile hydraulics, the semiconductor industry, the food industry, aeronautics, medicine, pharmacy, oil and gas transport technology, environmental engineering, laboratory and testing technology, household and sanitary systems, and in mining and in the field of steelworks, power plants, wind-power installations, machine

tools, transfer presses and plastic injection moulding machines, namely, pressure regulators for gas installations; heat exchangers for stationary and mobile applications for exchanging heat between liquid and/or gaseous media; cooling and heating installations for media therein, namely, heat exchangers not as parts of machines

Respectfully submitted,

/Mark S. Bicks/

03/18/2016
